-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1. This is a first Office action on the merits for application serial number 10/823122 filed 04/12/04. Claims 1-9 are pending.

2. The disclosure is objected to because of the following informalities: reference numeral 21 is used to designate both the fixing plate and drive shaft. It appears that the fixing plate should be referenced by number 23.

Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 2,960,094 to Small.

Small provides hollow rod 10, pulley 14, cord 15, slide 13, drive shaft 17 having a distal end connected to, via gear 21 and pinion 30, and rotated by motor 29, skeleton 11/12 and bearing plated 18/19.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 2,960,094 to Small.

Small provides each of the elements of the claims as noted above except for a wireless receiver.

The examiner takes Official Notice that it would have been obvious to one having ordinary skill in the art to have used a wireless receiver to operate the switch (Figure 3) of Small as it is extremely well known that switches may be operated remotely.

7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 2,960,094 to Small in view of U.S. Patent 2,745,421 to Russell.

Small provides each of the elements of the claims as noted above except for specifying that the slide is T-shaped.

Russell shows that T-shaped slides or runners 16 were known at the time of the invention.

It would have been obvious at the time of the invention to one having ordinary skill in the art that the slide 13 of Small could have been T-shaped as taught by Russell at 16. It would have been obvious to have used a known equivalent part. No unexpected results is described from the use of a T-shape runner. A T-shaped runner also provides a flange which allows for a simple connection of the cord.

8. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

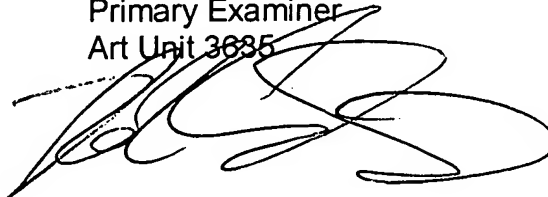

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6840. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
